Scoring:

Each league round must be identified as so to the staff in the clubhouse prior to beginning. Each target must be marked with an X or 0, hit & loss on the scorecard. It will be up to the other people present to call it out and verify hit or loss. A hit is a visible chip verified by one other person in your shooting group. Once the shooting is concluded, you must count and record your total score and sign your scorecard (attesting that it is true and accurate) before handing it in to the club staff. Each team must have at least 4 posted scores (from 4 separate team members) each league round that will add up for a team total for that round. If your team has more than 4 shooters only the 4 highest scores (from 4 separate team members) will count for any given round. The others (lower scores) will be thrown out for that round. If you miss a league round, you will be given a zero. If a team does not post at least 4 scores (from 4 separate team members) for a league round the team will receive a zero. **Only league shooters and league teams completing all 10 rounds of league will qualify to win awards and prizes at the conclusion of the league year.**

Re-Score:

Shooters can shoot each league round as many times as you want and keep your best score, but it must be shot during the scheduled league month.

Individual Competition:

Each shooter that completes all 10 rounds of league will compete for the Overall High Gun Award, Overall High Ladies Award, and Overall High Youth (age 17 and under) Award. If there are any ties a shoot-off will be conducted during the year-end banquet to determine the winner. All winners will receive trophies and prizes.

Team Competition, Classes, and Team Scoring:

The league is 10 rounds of 50 targets, for a total of 500 targets. The first 2 rounds will be shot against all the teams in the league to determine what class your team will be placed in. Your complete team average score will be used for the purpose of placing teams. Once the teams are divided into classes, competition will begin using the best four cumulative scores per round. The team with highest total score based on this method wins. If there are any ties a shoot-off will be conducted during the year-end banquet to determine the winner. All class winners will receive trophies and prizes.

Clay Mate Card Readers:

Stations have the Promatic Clay Readers. When purchasing a league round of sporting clays, we will give the group shooting a card with the 50 targets for each shooter plus a "show bird" for each trap on the course during shooting for the first time in the month. After the first time a month shooting the course you will not receive the showbirds unless you purchase those separately. Do not shoot extra targets during a league round. Look at show birds, shoot at all others and record the score of all birds shot at.
